

October Task Day

Sunday 26th October Task Day was at Frank Wheel car park with 17 volunteers helping. The main task was to install a flood water diversion to protect the footpath and to restore the car park and footpath surfaces. This was a repeat of a similar task day at the same location last year following Storm Babet but alas further storms washed the car park and footpath topping away. The task day was very well attended and successfully executed. Other tasks included cutting back undergrowth and clearing the goits of Frank Wheel and Wolf Wheel whose dams were in danger of drying out. The overflow threshold at Frank has been raised by unknown persons to divert more water into the dam.
